Step-by-Step Walkthroughs is the CitizenDesk feature that turns a government procedure, like renewing a passport, into a simple guide of numbered steps. Each step is tagged with a label either Online or In person, so citizens always know whether they can finish it from home or must visit an office. As they complete each phase, they tick a “Mark as done” checkbox, and the progress card, the mini stepper and the highlighted current step all update together. Every step can be expanded to show instructions, required documents, the official fee, the time it takes and a practical tip. In-person steps also include a “Find nearest office” button that links to the Office Locator. Citizens can filter to see all steps, only online steps or only in-person steps, and they can expand everything at once or reset their progress. A summary sidebar shows the step counts, the total official fee, the documents needed, help links and a warning to avoid middlemen, which supports your goal of cutting out overcharging agents.
